

## The GigRig™ Distributor

The GigRig Distributor works as part of our Modular Power Supply to distribute power across your pedalboard. The Distributor has six non-isolated 9v outputs that can deliver HUGE amounts of current when needed. Use The GigRig Generator to power your Distributor and from there you can add Isolators, High Current Adapters, Virtual Batteries and Cable Adapters to correctly power your DC powered equipment.

### Instructions for use:

Each Distributor is supplied with 6 x 1.5 metre length DC leads with right angled 2.1mm connectors to power your equipment and 1 metre of cable wrap to keep your leads tidy once installed.

Simply follow the instructions listed in the diagram provided to correctly connect them.

**Please note, we cannot guarantee the performance of the adapter from any other power supply other than**

**DO NOT STRIP THE CABLE.**

**DO NOT COVER THE ADAPTER, IT MAY OVERHEAT AND SWITCH OFF!**

It is normal for the adapter to run warm.

The GigRig Distributor is designed for indoor use. (Just don't get it wet!).

Fully compliant with **RoHSV** (lead free product.)

#### Warranty:

The GigRig warrants the product to be free from defects in material and workmanship for a period of 2 years from the original date of purchase. If the product fails within the warranty period, The GigRig will repair or, at our discretion, replace the product and cover the cost of return shipping to the original purchaser. This warranty covers defects in manufacturing discovered while using this product as recommended by The GigRig. This warranty does not cover loss or theft, nor does the coverage extend to damage caused by misuse, abuse, unauthorized modification, improper storage, lightning, or natural disasters. Damage caused by any of the above circumstances may result in a non-warranty repair fee.

#### Disposal:

Return the unit to The GigRig Ltd for disposal or use standard disposal for electrical equipment recommended in your country.
